Press Release

AGC of NH's Executive Vice President Recognized With Honor Road Award

The Associated General Contractors of New Hampshire's (AGC of NH) Executive Vice President, Gary Abbott, was recognized with the Honor Road Award from the New Hampshire Good Roads Association at their Annual Meeting on April 14, 2011. The Honor Road Award recognizes "those individuals who have helped encourage the development of a safe, efficient, and environmentally sound transportation system in New Hampshire." Recipients receive a lifetime membership to New Hampshire Good Roads, a crystal replica of the state of New Hampshire and their names engraved on a plaque that is displayed at the Good Roads office.

Voted on by panel of industry professionals, each year the New Hampshire Good Roads Association, an organization that works to promote the development of a safe and environmentally sound transportation system, chooses one recipient who embodies the mission of the organization. Gary Abbott was chosen for his commitment and dedication to educating the public about the importance of an adequate transportation system. He has been a part of the construction industry for over twenty eight years, and has been the Executive Vice President of the AGC of NH since 1985.

New Hampshire's Governor John Lynch presented Gary Abbott with the award. Of the recognition, Gary Abbott remarked, "I am deeply gratified to be recognized by an independent organization for the effort I have put into my work with the Associated General Contractors of New Hampshire."

###

AGC of NH's membership includes contractors from both the building and highway industry, which perform commercial and industrial, public and private work in the state. AGC of NH serves as a liaison between its membership and government bodies, provides informational support services, safety training, construction documents, and plans room facilities for the construction industry.
